Religion

DIALOGUE BETWEEN SCIENCE AND RELIGION **(KST/DSR)**

Starting Wednesday **September 26**, 2018 at CMTF, **Univerzité 22, Room U11**
First class will run **from 17:20-18:55**, then we could divide course to two parts.

Evaluation: 4 credits for class activities and colloquium in the last class.

Instructor: ThLic. Ing. František (Frank) Mikeš, Ph.D. fmikes@elabs.com

- Welcome to all students from any shade of religion/spirituality or without it. The basic task of the course is this: To awaken in you an unconscious intuition based on science, and it's gift to humankind, which is Evolution – that we are all on its journey.
- For religious believers: To try gently to evoke in you a sense that such an evolutionary journey is convergent and, if taken, should lead humankind to it's next level, to Omega Point, to God.
- For non-religious students: To convince you that there is a new phylum of Christianity where dialogue with sciences is a necessity.
- REMEMBER: Only dialogue between the domains of Science and Religion can "prevent the growth of a new clone of evil", which could surprise us, as happened twice during the last century by Nazism and Communism.
- Some themes in the course:
 - Introduction to Dialogue Science and Religion
 - Non-Christian Religions and Science
 - New Phylum Christianity where evolution is already inserted
 - Free Will and Evil from religious and scientific points of view

Remember that "**Religion without Science is Blind**" (A. Einstein) and that "**Science can Purify Religion from Error and Superstition**" (Pope John Paul II).

"Come now and let us reason together!" (Isaiah 1:18)
